Robert Wood Johnson Foundation Physician Faculty Scholars – RWJF PFS

This program is designed to strengthen the leadership and academic productivity of junior medical school faculty who are dedicated to improving health and health care. Under the program, scholars receive: funds to support a research project; at least 50 percent protected time for three years to do their research; active mentorship by nationally recognized leaders; and the opportunity to work with other talented scholars.

Robert Wood Johnson Foundation Clinical Scholars Program – RWJF CSP

For more than three decades the Clinical Scholars program has fostered the development of physicians who are leading the transformation of health care in this country through positions in academic medicine, public health, and other leadership roles. Through this two year, post-residency training program future leaders will learn to conduct innovative research and work with communities, organizations, practitioners, and policy makers on issues important to the health and well-being of all Americans.

Harold Amos Medical Faculty Development Program – AMFDP

This program provides four-year postdoctoral research awards to physicians from historically underrepresented groups who are committed to developing careers in academic medicine, to improving the health of underserved populations, and/or to furthering understanding and elimination of health disparities.
